ULTRA BROAD BAND DIVIDER COVERS 1-40GHz

Devens, MA - Response Microwave, Inc. a global specialist in providing RF/Microwave customer solutions, is pleased to announce the availability of its new broad band 2-way power divider for use in ATE and production 5G applications.

The new RMPD2.1-40.292f covers the 1-40GHz band offering typical electrical performance of 1.2dB max insertion loss, VSWR of 1.70:1 max and minimum directivity of 15dB. Power handling is 20W and the unit is operational over the -55° to +125°C range. Mechanical package is 3.0 x 1.0 x 0.5 inches, plus stainless steel 2.92mm female connectors. Alternate division values are available on request, as are narrower bandwidths.

For more information on this new line or to discuss how we can satisfy your application specific requirement, please contact Response Microwave, Inc. at (978) 772-3767, www.responsemicrowave.com, or by e-mail at; info@responsemicrowave.com .
