

Call for Workshops

IMS2026 | 7 – 12 June 2026 | ims-ieee.org
Boston Convention Center (BCEC), Boston, MA
Deadline: 29 September 2025

IMS (www.ims-ieee.org) is the world's premier RF/microwave technical conference and industry exhibition.

The week features the **RF Integrated Circuit (RFIC)** Symposium, as well as two new symposia formed out of traditional IMS technical content—the **RF Systems & Applications (RFSA)** Symposium and the **RF Technology & Techniques (RFTT)** Symposium. Along with the ARFTG Conference (www.arftg.org), it offers technical sessions, interactive forums, plenary and panel sessions, workshops, technical lectures, student competitions, and industrial and historical exhibits.

The symposia will feature a variety of important thematic areas that highlight the symposia's focus on "Revolutionizing RF". In addition to showcasing a broad spectrum of engaging technical topics, the symposia will emphasize the diversity of contributions, talents, and accomplishments across our society throughout the

week. Therefore, workshop proposals should clearly outline how they aim to ensure representation and inclusivity in the selection of contributors and speakers, as this will be a key criterion in the evaluation of proposals.

Workshop Proposals Submission and Deadline: Workshop organizers must complete an online submission form including relevant information such as the workshop title, abstract and a list of confirmed speakers with the title and abstract of their presentations. MTT Technical Committees will be involved in the review process, therefore connecting with at least one Technical Committee with affinity with the topics addressed in the workshop proposal is beneficial. Proposals should be submitted via www.ims-ieee.org until 29 September 2025. The proposals will be evaluated by the steering committee and the decision will be communicated to the organizers in November 2025.
