## A Pioneer of RF & Microwave Filters

...employing proven design elements  
(Lumped, Compline/Cavity, and Tubular)  
to produce high-quality Passband,  
Lowpass, Highpass, and Bandstop  
Microwave Filters... including Diplexers,  
Multiplexers, Filter Banks, Multipliers...  
also Rotary Attenuators

**Telonic Berkeley filters** are known and used worldwide. Our impressive array of fixed filter types has evolved over the years in responding to the demanding needs of the electronic industry while offering performance parameters tailored specifically to each customer's unique requirements.
