

# Call for Papers for the IEEE Transactions on MTT *Special Issue* on the 2019 IEEE MTT-S International Microwave Symposium

The IEEE Transactions on Microwave Theory and Techniques (IEEE T-MTT) will publish a Special Issue devoted to the 2019 IEEE MTT-S International Microwave Symposium (IMS 2019). **Authors of all papers accepted for presentation at the IMS 2019 are invited to submit an expanded version of their papers to the Special Issue.** The expanded version requires that new technical content is included, such as a more in-depth treatment, new results beyond the IMS 2019 paper, or other substantially new information. Every paper will be reviewed in the same manner as all other regular submissions to this publication. **Therefore, authors of papers presented at the IMS 2019 are invited to submit a substantially expanded version of their papers to the Special Issue.**

The submission is accomplished through the ScholarOne Manuscript Central website (<http://mc.manuscriptcentral.com/tmtt-ieee>), in exactly the same way as any other regular MTT Transactions' submission. When you prepare your manuscript you should consult the Instructions for Authors (<http://www.mtt.org/author-information-transactions>) and follow the T-MTT Word or LaTeX Templates available there. Papers not following these templates cannot be accepted into the peer review process.

Please be aware that your contribution should be **prepared as any other regular T-MTT paper**, and that it will be evaluated via the same peer-review process. The quality of your contribution **must meet the level required for a publication in the MTT Transactions**. Since your contribution is an expanded version of your conference paper, it is important to note, that, according to the instructions for authors, you must meet the following requirement:

*"... You must reference your own work, especially recent journal/conference publications. Discuss your related publications in the introduction and distinguish the new results you present in your current manuscript from those found in your previous publications. While there is not a specific criteria that must be met, such as 60% new technical material, the reviewers are asked to determine if the paper provides "sufficient new technical material to justify a new paper" when compared to all previously published papers. This standard must be met by all papers, including papers that are submitted to conference special issues. Note that longer introductions and lists of references do not qualify as "technical material." It is acceptable to repeat some results to properly explain the concept and to create a self-contained paper for the reader, but this should be done only when necessary. Please attach pdf files of the previous papers....."*

Any manuscripts that are not ready for publication by the time the Special Issue enters production, will not publish in the December 2019 Special Issue, but will be published in a future regular issue, if ultimately accepted.

## Other submission instructions:

- (1) In the pull-down menu for "Manuscript Type", please select "2019 IMS Special Issue".
- (2) The conference paper should be included with the submission as well.
- (3) Discuss the expansion over the IMS 2019 paper in the Introduction (very important).
- (4) The following note should be added to the footnote on the first page of the paper: *"This paper is an expanded version from the IEEE MTT-S International Microwave Symposium (IMS 2019), Boston, MA, USA, June 2-7, 2019."*

The due date for the paper submission is **May 3, 2019.**
