

## JQL TECHNOLOGIES SHOWCASES NEW PRODUCTS AT THE IMS 2022

### About JQL Technologies

JQL specializes in the design and manufacture of Ferrites & Filters, up to 110 GHz. Ferrite devices include Isolators, Circulators, Waveguides & Microstrip devices. RF and microwave filters include duplexers, and subassemblies, including ceramic, cavity, waveguide & ceramic waveguide filters. JQL supplies many of today's most significant military, commercial and homeland security programs. Applications include satellite communications & space, radar, radio communications, fire control radars, telemetry applications, missile guidance systems, mobile radio base stations, public safety systems and air traffic control and communications. JQL is one of the world leaders for isolators & circulators for 5G applications.

### Product Highlights

#### *Isolators & Circulators*

- > Coaxial
- > Drop-In
- > Microstrip
- > Waveguides

#### *RF Filters*

- > Cavity Filters
- > Discrete Filters
- > Ceramic Filters
- > Waveguide Filters
- > Ceramic waveguide Filters
- > Diplexers
- > Multiplexers
