

MUEGGE

POWER TO YOUR PROJECTS

The MUEGGE Group is your ideal partner for microwave technology in advanced industrial heating and plasma applications.

The engineering and manufacturing capabilities of our highly qualified staff establishes MUEGGE as a world leader in microwave systems and components.

MUEGGE brings technical expertise and extensive application competence in the development, production and implementation of high-power microwave technology and provides unique solutions for your technical challenges.

Our portfolio includes microwave generators in 2.45 GHz and 915 MHz from 1 kW to 100 kW, the related waveguide and matching components. Magnetrons, plasma systems and plasma components, such as plasma-array for large area deposition, remote plasma sources, atmospheric plasma sources and downstream sources complete our range of products.
