

Taitien releases Low Phase Noise OCXO at 100 MHz with High Stability and Low G sensitivity

The Taitien NA-100-6900 is a 100.000 MHz, high performance OCXO offering low noise and low G-sensitivity. Coming in a small 25mm x 25mm package it is ideal for portable for Applications like Radar, Satellite and Test & Measurement or any application requiring big performance in a small package. The G-sensitivity is < 1 ppb/g, worst Axis and the phase noise available is <-135 dBc at 100 Hz and <-185 dBc at the floor. The stability over -40 to +85 is a small ± 200 ppb
