

Taitien releases miniature Low Phase Noise OCXO at with Low Cost, High Stability

The Taitien NK-H type offers big OCXO performance in a small 14 mm x 9mm package. Available from 10 MHz to 40 MHz, the 6 pin Hermetic SMT package is ideal for outdoor applications such as Small Cell and IEEE-1588. With excellent long-term aging the stability is as low as  $\pm 10$ ppb(-40°C to +85°C). The phase noise is <-145 dBc at 100 Hz and <-160 dBc at the floor.
