1.0mm to 1.85mm ADAPTOR CONFIGURATIONS COVER DC-65GHz

Devens, MA - Response Microwave, Inc. a global specialist in providing RF/Microwave customer solutions, is pleased to announce the availability of between-series 1.0mm to 1.85mm to its comprehensive adaptor series for use in ATE and production applications.

Operational from DC-65GHz, the new product offers max VSWR of 1.25:1 and insertion loss of $0.07 \times \sqrt{f} \times 0.5\text{dB}$ max. Units withstand the -55° to $+105^{\circ}$ C temperature range and configurations are available in all Gender combinations for each interface.

Units are robust SUS303 stainless steel with passivated finish and utilize PEEK dielectric material and interfaces comply with IEC standards.

For more information on this new line or to discuss how we can satisfy your application specific requirement, please contact Response Microwave, Inc. at (978) 772-3767, www.responsemicrowave.com, or by e-mail at; info@responsemicrowave.com .
