RPC-1.00 Portfolio significantly expanded

Expanded Portfolio: Flexible and semi-rigid cable assemblies, adaptors RPC-1.00-WSMP, test port adaptors and launcher jacks

The standard portfolio of the precision connector series RPC-1.00 has been revised and significantly expanded.

Flexible and semi-rigid cable assemblies are offered in the RPC-1.00 - RPC-1.00 interface configuration as well as in the RPC-1.00 - RPC-1.35 / RPC-1.85 / WSMP configurations. Low-cost "economical" versions are also available.

Inter-Series adapters are now also available in the RPC-1.00-WSMP version, test port adaptors and launcher jacks are also new in the program. The standard program is rounded off by in-series adaptors, PCB connectors, waveguide coaxial adaptors and gauge kits. Customized cable assemblies with or without armoring are available upon request.

RPC 1.00 connectors and cable assemblies are used for demanding test and measurement applications up to 110 GHz and are characterized by highest reliability and repeatability, excellent return loss values and mating compatibility with all common 1.00 mm connectors.

About Rosenberger North America

Rosenberger North America is a wholly owned subsidiary of the Rosenberger Group, which was founded more than 25 years ago in Pennsylvania. As an industry leader, Rosenberger provides a wide range of standardized and proprietary connectivity solutions to a variety of customers across multiple industries and market segments.

About Rosenberger

Rosenberger is one of the world's leading manufacturers of impedance-controlled and optical interconnect solutions in high-frequency, high-voltage and fibre-optic technology.

The product range covers RF coaxial connectors, components and accessories, RF measurement products as well as cable assemblies for mobile communication networks, data centres, industrial test & measurement, automotive electronics as well as for high-voltage contact systems, medical and industrial electronics as well as aerospace engineering. The custom machining division manufactures customer-specific precision parts from all machinable materials for various industries such as the automotive and commercial vehicle industry, ship building or classic mechanical and plant engineering.

Worldwide, the Rosenberger Group operates manufacturing and assembly locations as well as Rosenberger sales offices in Europe, Asia and North and South America where – in total – approx. 14,800 employees develop, produce and sell our products. In 2021, the Rosenberger Group achieved global sales
